Suresh ANGARA

Norton Thoracic Institute, St. Joseph's Hospital and Medical Center (Phoenix, USA)

Regulation of Alveolar Epithelium and Inflammation in ILD and SSc-ILD

Dr. Angara earned his doctorate (Ph.D.) degree from the University of Strathclyde, Glasgow, in the United Kingdom. He underwent postdoctoral training at the prestigious Yale University School of Medicine and Weill Cornell School of Medicine. Dr. Angara is currently an Assistant Professor at the Department of Norton Thoracic Institute, St. Joseph Hospital and Medical Center, Creighton University. His lab research focuses on molecular and cellular mechanisms of lung injury, repair and fibrosis, with a particular focus on alveolar epithelial cell-state control, epithelial stress, senescence, inflammation, and IGF signaling. Dr. Angara has authored publications in lung injury, fibrosis, transplantation, and tissue repair biology, and he currently serves in editorial and reviewer roles for several lung-specific journals.
